

## The Wheelchair Mobility Problem

- Lack of suitable transportation limits mobility for wheelchair users.
- Many users and caregivers are unable to load a wheelchair into a vehicle, further reducing the user's mobility.
- The typical alternative requires the addition of a trailer hitch or other modifications to a vehicle, so a carrier can be installed.
- The *Wheels<sup>Up</sup> Wheelchair Lift* eliminates the need to physically lift a wheelchair into a vehicle.

## Testimonials

**“As an occupational therapist, I feel this invention is invaluable. This product increases people’s ability to go out into the community while decreasing their care providers’ incidents of injury.”**

- Deborah L.

**“Fantastic idea! Imagine – having the wheelchair lifted onto the exterior of the car instead of wrestling it into the trunk! Backs everywhere are breathing a sigh of relief.”**

- Barbara S.

**“The chair lift makes it much easier to take my Mom to the doctor.”**

- Karen J.

## Reduce Your Risk of Back Injury

- The patent-pending **Wheels<sup>Up</sup> Wheelchair Lift** originally was created to save the back of a caregiver who was injured helping a loved one.
- The wheelchair is raised and lowered with an easy-to-use hand crank.
- Worry-free wheelchair transport for wheelchair users and their caregivers.

## The Wheels<sup>Up</sup> Wheelchair Lift Solution

- Durable, light weight metal frame, padded to protect your vehicle.
- Installs in a couple of minutes. No tools required.
- When not in use, the **Wheels<sup>Up</sup> Wheelchair Lift** may be quickly removed and stored in the trunk.
- Manufactured in the U.S.A.
- 90-day limited warranty on parts and labor.
- Wheelchair covers and locking devices are available

## Versatility

No vehicle modifications are needed to use the **Wheels<sup>Up</sup> Wheelchair Lift** on virtually any car, minivan, or SUV.

This product greatly expands the transportation options that are available to those who use a wheelchair.
